Object : Graduate Automation Engineer Job

**Dear Mr Thomas,**

After studying Automatic and IT in France at the IUT of Nice, I answer to the job offer that you published to become an engineer on automatic.

I worked in an international company, Siemens during 1 year but now i want to travel and discover an other country, an other culture but i need to practice my job.

As you know by reading my resumé, you can see i've been studying electronic, automatic and IT so i can say i'm multipurpose. I like to work on a projet with a team but i can also work alone.

It would be my pleasure to discuss further how I could put my ambition to the best use within your company

I look forward to hearing from you.

Your Sincerely

Marc BECHI
